DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-22, drawn to a method of conducting an assay, classified in class 435, subclass 7.21.
 - II. Claims 23-29, drawn to an optical disc, classified in class 435, subclass 288.4.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method of invention I can be performed using any biodisc, while the optical disc of invention II can be further used as a centrifuge or as a filtration device.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for one group is not required for others, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Michael Diener on January 2, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1641

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
